

1. Website Name:

- **Chess Pieces Unveiled**

2. Description of Your Topic (at least 5 sentences):

- **Content:**
 - "Chess Pieces Unveiled" is a website dedicated to exploring the unique capabilities and strategic roles of each chess piece. Each page on the site will focus on a specific chess piece—King, Queen, Rook, Bishop, Knight, and Pawn, offering detailed descriptions of their movements, strengths, and weaknesses. The site will provide users with diagrams and examples to help them visualize and understand the strategic importance of each piece in various phases of the game. By breaking down the fundamental aspects of each piece, the website aims to enhance the user's understanding of chess and improve their gameplay. Additionally, users will learn about special chess moves, such as castling and pawn promotion, that can dramatically change the course of a game.

3. List of Each of the Page Names:

- **Home:** Introduction to the website and the importance of understanding each chess piece.
- **King:** Detailed information about the King, its movements, and its strategic importance.
- **Queen:** Exploration of the Queen's capabilities and how to maximize its potential on the board.
- **Rook, Bishop, Knight:** Separate pages for each piece, covering their unique movements and strategic roles.
- **Pawn:** Comprehensive analysis of the pawn, including its movement, promotion, and role in strategies.

4. Description of the Data You Will Be Storing, Manipulating, and Viewing:

- **Content:**
 - The website will store and display a database of chess strategies and examples, specifically focusing on how each chess piece can be utilized effectively. This database will include information such as the piece involved, a description of the strategy, and a move-by-move breakdown of how the strategy is executed.
 - Users will be able to explore these strategies interactively, viewing the step-by-step progression of each move.
 - There will also be a submission feature where users can contribute their own strategies or favorite moves related to a particular piece. These submissions will be stored in the database and reviewed by an administrator before being published.
